July 27, 2017

To Whom It May Concern:

After 38 years of providing testing services to many customers, I have decided to finally retire as of July 2017. Many of you have been loyal customers for the majority of those years. I would like to take this opportunity to thank you for allowing **Air Contamination Technologies** to provide service to your facilities.

Even though I am retiring, your facilities will continue to require testing services. I have given careful consideration in selecting a company to continue providing the best service to **ACT's** clients without interruption to your testing needs. I have selected **ACE LABORATORY SYSTEMS** to continue to provide you with the highest quality services that you deserve.

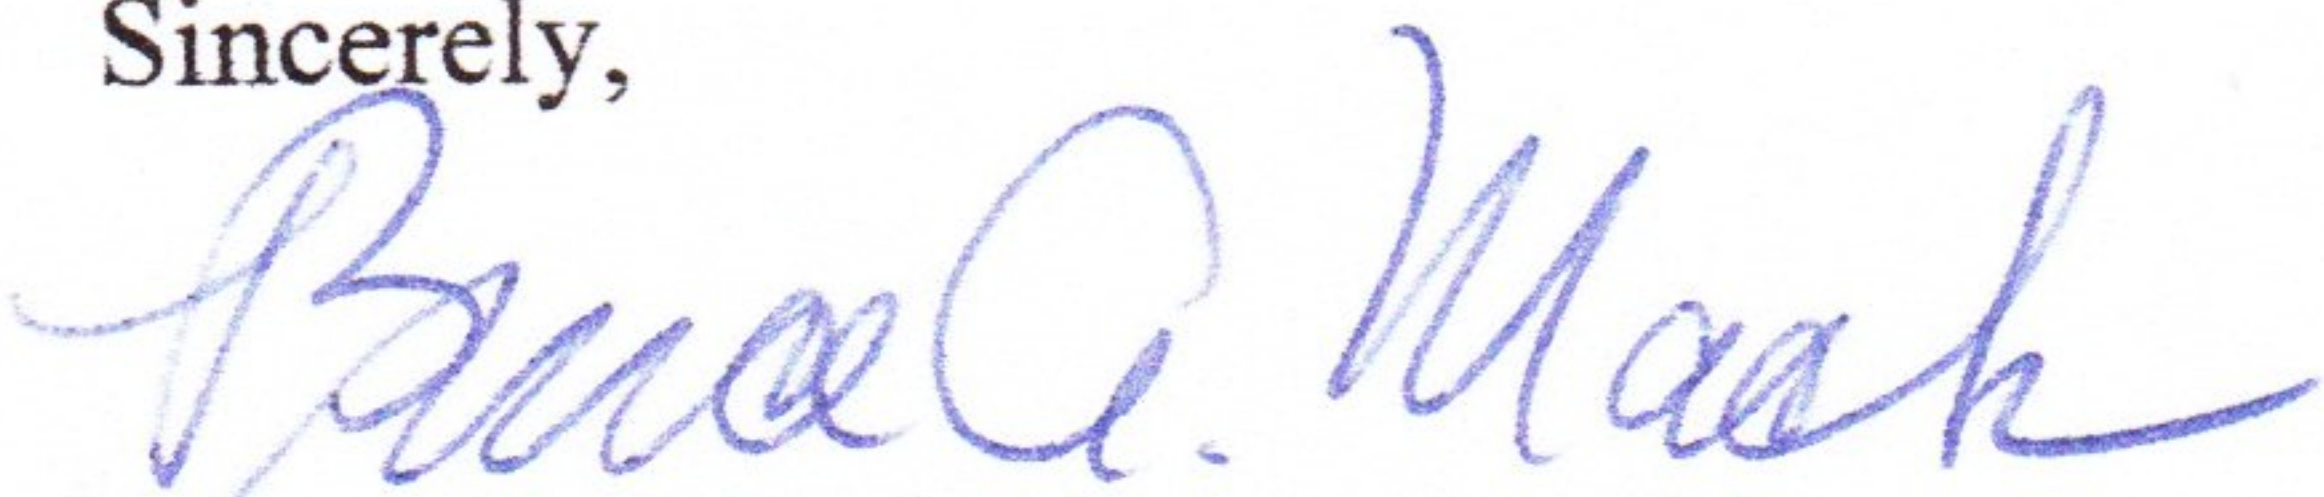

ACE LABS, based in St. Louis, has been in business since 1985. They are NEBB Clean Room certified, CETA Clean Room certified, and NSF certified. They have a microbiologist on staff for environmental sampling services (viable sampling) and contamination control assistance. They offer Consultation Services for USP <797> and <800> compliance. **ACE LABS** can provide design/build services for new Clean Rooms or Clean Room upgrades. They also provide services for various other laboratory equipment. I feel that they are an excellent choice for all of your service requirements. A representative from their company will be contacting you in a timely fashion to setup an appointment for service. Please visit **ACE's** website at www.acelabsystems.com for more information on the additional services they can provide and their qualifications.

If you require immediate assistance, **ACE** can be contacted at 314-771-7272, or via their email: service@acelabsystems.com.

All previously issued invoices for service and testing by **Air Contamination Technologies** should continue to be paid to **Air Contamination Technologies** per the invoice address.

Thank you for your business.

Sincerely,

Bruce A. Mack, Owner/President
