

## Laboratory-Specific Radiation Safety Training

Laboratory Supervisor \_\_\_\_\_ Permit no. \_\_\_\_\_

General practices on using radioisotopes are found under [Using Radioactive Materials](#) and [Contamination Surveys](#). In addition to completing the [Radioactive Materials Safety Training](#) online, **users must receive training on the lab-specific procedures they will perform. Training should include:**

- Isotopes used and their specific hazards.
- Shielding requirements and shielding devices employed.
- Use of Personal Protective Equipment.
- Record keeping.
- Survey requirements, locations, detectors used and their operation.
- Waste collection and disposal
- Emergency response in the event of a spill or accidental exposure.

The following users have been trained:
